Can Your Facility Qualify as a Kansas Crop Improvement Association Bulk Retail Facility (BRF)?

Upon approval by the Kansas Crop Improvement Association (KCIA), a Bulk Retail Facility (BRF) may purchase certified seed in bulk from a certified seed producer for retail bulk sale through that facility. The Certified Class and the Registered Class (subject to licensing and marketing agreements) of seed may be sold by the Bulk Retail Facility. To purchase certified seed for resale a *Transfer or Resale of Kansas Certified Seed in Bulk* form is necessary and may be obtained from KCIA. A *Bulk Retail Sale Certificate*, or a certified label attached to an invoice (*Bulk Invoice Label*), must accompany each retail sale of certified seed. A resale is the purchase of eligible certified seed by the bulk retail facility. A retail sale is a sale by the bulk retail facility of eligible seed the end-user, the farmer.

Approval as a Bulk Retail Facility must be renewed on an annual basis. Adherence to the standards and procedures governing the movement of certified seed through a BRF will be given due attention by the KCIA when considering renewing BRF status for a facility. Separate application must be made for each physical location wishing to be considered as a BRF.

The following is required for approval as a Bulk Retail Facility:

- Dedicated bins and conveying equipment completely separate from any grain-handling equipment
- Equipment which can be properly cleaned
- A separate bin designed so that it cannot be contaminated by an outside source for each variety
- A separate, dedicated, unloader for each bin, or an approved self-cleaning conveyor system
- A method of labeling bins to prevent mis-identification
- A legal weigh-scale of sufficient capacity and with an up-to-date certificate of inspection either on the BRF site or at ready access to the BRF
- System of record keeping for retail sales which includes the purchaser, amount, date, and certification/lot number (inventory sheet)
- A $250.00 fee per each new location. Annual renewal of compliant facilities is $100.00.
- Mandatory training of all personnel at the “seed handling level” including administrative as well as yard personnel
- Compliance with all pertinent standards, procedures, and seed laws

As a purveyor of certified seed in Kansas, you will become part of a long history of seedsmen dedicated to providing quality seed of known origin and variety to Kansas producers. It is your responsibility to understand the standards and procedures involved in handling certified seed to insure that neither this reputation nor yours is tarnished.

You are welcome to contact our office with questions at 785-532-6118. Our office hours are 8-12 and 1-5 weekdays. Our fax number is 785-532-6551.
Kansas Crop Improvement Association
Bulk Retail Facility Standards

A Bulk Retail Facility is any location used for the retail sale of bulk seed within the boundaries of Kansas and is not owned or leased by a certification applicant. This facility can accept the certified class of seed for the purpose of reselling such seed in bulk directly to the end-user.

I. Application

Any person or business located in the state of Kansas may make application for a Bulk Retail Facility. All applications must be made on forms provided by the KCIA office. Applications must be received by September 1 of each year. Varieties to be sold at each site shall be designated at the time of application. Substitution may be permitted at a later date.

II. Requirements

A. Eligible seed

Only the registered and certified classes of seed that has been certified by the Kansas Crop Improvement Association and is eligible for resale may be sold through the Bulk Retail Facility. The seed must have been purchased in accordance with KCIA Standards for the resale of bulk Certified Seed using the Transfer or Resale of Kansas Certified Seed in Bulk form.

B. Facilities

1. A separate bin for each variety is required which cannot be contaminated from an outside source.
2. A separate bin unloading device is required for each variety. Each unloading device must be identified by the variety it is to handle. Belt conveyors of a self-cleaning design and servicing multiple bins will be considered for use by the Bulk Retail Facility, provided that all bins serviced by the conveyor are dedicated to Kansas Certified seed or are clean and empty during the period of certified seed sales activity or whenever Kansas Certified seed is present in any of the bins.
3. Legal scales must be available to adequately weigh the largest vehicle which might be used.

C. Records

Complete up-to-date records must be kept which include purchaser, amount, date, certification/lot number and remaining inventory. Forms are available upon request from the KCIA office.

D. Designated representative

An individual at each Bulk Retail Facility shall be designated as responsible for all records and activities that relate to the distribution of bulk certified seed from that site. The Bulk Retail Facility should contact the KCIA office to confirm eligibility of any seed for resale. The resale number will become the reseller’s certification number for the lot of seed.

III. Sampling Recommendations

A. Samples from each bulk resale must be kept at the Bulk Retail Facility for at least one (1) year from the last date of sale for instate sales, and three (3) years for interstate sales according to state and federal laws.

B. A one-pound representative sample should be taken from each truck as it is filling the bin. The sample should be labeled with certification/lot number and delivery number.

C. A one-pound representative sample should be taken from each bulk sale. The sample should be labeled with certification/lot number and delivery number.
IV. Inspections
An initial scheduled inspection will be made within 14 days after application and prior to any delivery of seed for the purpose of establishing the suitability of facilities, personnel, etc. Once a location has been deemed suitable, no further inspection is required. KCIA may inspect (at its own cost) without advance notification any facility, records, personnel, etc. during regular business hours. The Bulk Approved Retail Facility applicant will be given notification should deficiencies be discovered during any inspection. Once deficiencies are corrected, the applicant must notify the KCIA to obtain permission for resumption of use. If an inspection is necessary, appropriate fees may be charged.

V. Seed Returns
Seed may not be returned from the end user to the Bulk Retail Facility.

VI. Bin Replenishment
Bins may be replenished at any time with eligible Certified seed of the same variety and crop year in accordance with KCIA Standards for the movement of bulk Certified seed. If a different variety is to be used, the bin and any filling and unloading devices must be thoroughly cleaned.

VII. Reporting
Seed Distribution and Inventory reports will be completed by each Bulk Retail Facility and sent to KCIA before December 15.

VIII. Bulk Sale Certificates
The Kansas Crop Improvement Association Bulk Retail Sale Certificate, or an official certification label attached to the seed invoice, must be given with each retail delivery of bulk certified seed. The Bulk Retail Facility must request Bulk Retail Sale Certificates and/or official labels directly from KCIA.

IX. Applicant Responsibilities
The applicant is responsible for meeting all pertinent requirements listed in the KCIA Standards and Procedures and maintaining the quality of the seed purchased for resale through the Bulk Retail Facility.

X. Education
It is the responsibility of the designated representatives at each Bulk Retail Facility to instruct all employees about the standards and procedures to be followed. Written instructions outlining delivery, sampling, and distributing procedures must be submitted with the application.
Procedures for Bulk Retail Facilities

Application to KCIA
1. Obtain application(s) for each facility from Kansas Crop Improvement Association (KCIA)
2. Submit application to KCIA by September 1 (two-week waiting period)
3. Clean facility for inspection (new facility sites or new bins at renewal site)
4. Contact KCIA to schedule facility inspection and educational meeting with all employees who will be involved in handling certified seed.

Upon Receipt of a Favorable Inspection
1. Obtain inventory forms for record keeping, or develop your own that meets record-keeping requirements.
2. Order *Transfer or Resale of Kansas Certified Seed in Bulk* forms. This form is required for each originating purchase of seed of a certified seed lot. A *Declaration of Additional Purchase of Certified Seed for Resale* form may be used to purchase additional amounts of seed of the same certification number.

To Receive Ownership of Certified Seed for Retail Sale at Facility
1. Seed must meet or exceed KCIA minimum standards for re-sale seed. Verify eligibility of seed (from producer or KCIA) before you purchase it for resale. Ask the producer to see the Certificate of Inspection or the laboratory analysis for the seed lot being purchased. The field report can provide additional information on the seed.

The status of all the seed in your bin drops to the lowest status of any seed placed in that bin and could render your seed unsalable.

Identifying eligible seed lots for resale (wholesale) purchase. The Registered and Certified classes of wheat, oat, barley, soybeans, triticale, or rye may be moved in bulk. The Foundation class may not be resold. Cleanout protocols and operational guidelines of the facility must minimize risk of cross-contamination of varieties and crop kinds. Seed must meet or exceed the following minimum requirements: 99.00% purity; 90% germination; 0.01% other crop seed; 0.01% weed seed; 0.98% inert matter; No noxious weeds. All resale seed sold will be labeled with the above analysis.

When a certified producer completes certification on a seed lot, he/she receives from KCIA a Certificate of Inspection that identifies the seed lot by a certification number prefixed by a “D” number, (i.e. D03789). Once the seed lot, or a portion of that seed lot is sold to an approved reseller, the portion thus received is identified by a “resale or “9” number” (i.e. 90345). The “9” number will be the certification number used by the bulk retail facility to sell this seed. The “D” number remains with the original certifier and is NOT to be used by the bulk retail facility.

Options for reselling seed depend on the status of the seed purchased.

Seed purchased from the original certification applicant will have a “D” number. The certification applicant should be able to show you the Certificate of Inspection. This seed may be sold by you to a farmer, or may be sold by you to another reseller who may then only sell to the farmer.

Seed identified by a “9” number has already moved at least once via a resale. You must verify that the seed has only moved once or you will not be able to sell it even if you’ve paid for it. The person from whom you are purchasing the seed should be able to show you the Transfer or Resale of Kansas Certified Seed in Bulk form he/she used to receive the seed and this should list the “D” number. If it identifies the seed with a “9” number, it is ineligible for resale. Placing this seed in your bin will render all of the seed in that bin ineligible, and illegal to sale. If it is identified by a “D” number, then your
purchase will constitute the second and final resale allowed for the seed and you may only sell it to the farmer. Placing this seed in your bin renders all seed in the bin only eligible for retail sell to the farmer. *Marketing or licensing agreements may restrict who may receive the Registered Class of some cultivars or there may not be an authorized Registered Class. The Bulk Retail Facility is responsible for the proper movement of all certified seed at its facility.*

2. The Bulk Retail Facility must maintain a 2 lb sample of each seed lot sold for one (1) year in-state or three (3) years interstate according to state and federal seed laws, respectively. Recommended, not required: Obtain representative samples of each load for own records. (2 lb sample usually sufficient).

3. Send completed and signed *Transfer or Resale of Kansas Certified Seed in Bulk* form (KCIA copy) to KCIA within five (5) business days of resale transaction. Record the date, certification number, resale number, and amount of seed received on the inventory sheet for that variety/bin.

4. Order *Bulk Retail Sale Certificates* and/or *Bulk Invoice Labels* from KCIA.
   
   **Seed Certified by another state:** Contact KCIA prior to purchasing out of state seed for resale.

**To Sell and Deliver Bulk Certified Seed to Customer**

1. By law, you must issue to customer a *Bulk Retail Sale Certificate*, or an official certification label (*Bulk Invoice Label*) attached to the seed invoice, for each sale at time of delivery/pick-up. The *Transfer or Resale of Kansas Certified Seed in Bulk* form number ("9" number) of the first load placed into the bin will be used as the certification number when labeling seed that is sold.

   Seed should not leave the site without certification documentation.

   If using *Bulk Invoice Labels* the invoice or scale ticket to which the label is attached must by Kansas Seed Law list the seller’s name and address; buyer’s name and address; certification number; class; variety name; weight sold, price per unit; basis for unit weight (i.e. $/60# bu) total price; and date.

   Obtain representative samples from each out-going load (recommendation only)

2. Record transaction on the *Bin Inventory Sheet*

3. Submit inventory reports and copies of *Bulk Retail Sale Certificates* to KCIA by December 15.
Errors to Avoid

The Bulk Retail Facility is responsible for ensuring that all applicable standards and procedures set forth by Kansas Crop Improvement Association, and all pertinent regulations set forth by state and federal seed laws, are adhered to. Below are some mistakes that are to be avoided.

Do not purchase seed for resale without using a Transfer or Resale of Kansas Certified Seed in Bulk, or a Declaration of Additional Purchase of Certified Seed for Resale form, if appropriate.

Each originating purchase of certified seed of a specific certified seed lot for resale must utilize a Transfer or Resale of Kansas Certified Seed in Bulk form. If additional seed of the same seed lot (same certification number) is desired, then the Declaration of Additional Purchase of Certified Seed for Resale may be used. Return resale documents or declarations to KCIA immediately.

Do not purchase seed for resale that has not completed certification. Seed has not completed certification until it has received a Certificate of Inspection from KCIA. Ask to see the form, or check with KCIA.

Do not purchase seed for resale that has exceeded the maximum number of resales allowed for that seed. The maximum number of times seed may move is:
1. Grower to 1st reseller,
2. 1st reseller to 2nd reseller,
3. 2nd reseller to farmer (terminal sale).
Seed may move a maximum of three (3) times.

Do not sell seed using the original certification applicant’s certification number. Your certification number is the “9” number (i.e. 90686 with the transaction year, i.e. “05” placed in front of it: “05-90686”). The certification number used by the original applicant to sell you the seed (i.e. “D022222”) remains with the original applicant.

Do not return seed that has been sold to the bin. Once seed is delivered to the end-user, it is no longer a class of certified seed. Returning such seed to the bin will render the entire contents uncertified and unsalable.

Do not fail to issue an appropriate Bulk Retail Sale Certificate or certified bulk invoice label with every load. State and Federal seed law, and KCIA standards, require that all seed be appropriately labeled. Make sure that you use the appropriate certification number, and that all information, including date of testing, weight, class, variety, and crop is complete and accurate.

Do not forget to keep your inventory sheet and other records up to date and to submit them to KCIA before the deadline, December 15, of the year of activity. The inventory sheet must show the re-sale number of each load placed in that bin, as well as the running total, even though you may be issuing labels using a “certified bin number”.

Do not hesitate to contact KCIA regarding questions you may have.
Plant Variety Protection (PVP)

Labeling Requirements for PVP Varieties

With the 1994 changes in the Plant Variety Protection (PVP) Act, getting the proper PVP statement(s) with the appropriate varieties has become more difficult. For those varieties that received certificates of protection prior to April 3, 1995, the requirement and statements remain the same. For those varieties applied for but without certificates before April 3, 1995, the requirements are unchanged unless the application was withdrawn and resubmitted after this date.

Use this set of statements for varieties pending or protected prior to April 3, 1995:

2. Unauthorized Propagation Prohibited - U.S. Variety Protection Applied For Specifying That Seed Of This Variety Is To Be Sold By Variety Name Only As A Class Of Certified Seed.
4. Unauthorized Propagation Prohibited - To Be Sold By Variety Name Only As A Class Of Certified Seed - U.S. Protected Variety.

For those varieties protected after April 3, 1995, these statements are to be used:

5. Unauthorized Propagation Prohibited - U.S. Protected Variety - 1994 PVPA.
6. Unauthorized Propagation Prohibited - To Be Sold By Variety Name Only As A Class Of Certified Seed - U.S. Protected Variety - 1994 PVPA.

As stated previously, the PVP Act requires all sellers to inform the buyer if a variety is protected and if it may only be sold as a class of certified seed (Title V option). The Act does not specify how this must be accomplished, but does state that by including the appropriate statement on the label, this requirement is satisfied. However, KCIA certification standards require that the PVP statement be present on the label.

To meet PVP labeling requirements the "PVP Level" may be indicated on the label with the following "legend" on the bag:

PVP LEVEL (Legend)

0. Not a Protected Variety.
2. Unauthorized Propagation Prohibited - U.S. Variety Protection Applied For Specifying That Seed Of This Variety Is To Be Sold By Variety Name Only As A Class Of Certified Seed.
4. Unauthorized Propagation Prohibited - To Be Sold By Variety Name Only As A Class Of Certified Seed - U.S. Protected Variety.
5. Unauthorized Propagation Prohibited - U.S. Protected Variety - 1994 PVPA.
6. Unauthorized Propagation Prohibited - To Be Sold By Variety Name Only As A Class Of Certified Seed - U.S. Protected Variety - 1994 PVPA.

TYPE OF REASSIGNMENT (check only one)
☐ TRANSFER of bulk certifiable seed from original applicant Field No. A to a KCIA Category 1 Approved Reseller who MUST condition the seed and complete certification prior to resale or retail sale of the seed. A Transfer Kit is required. Label the transfer kit and sample bags, and final CSI sample(s) . Submit Transfer Kit with sample and KCIA copy within 5 business days.

☒ 1st RESALE movement of bulk registered or certified class seed from original applicant to a KCIA approved reseller who can label the seed for resale or retail sale. This seed lot has been certified as Certification No. D 2222. Seller guarantees label analysis: Pure Seed 99.00%; Inert Matter 0.98%; Weed Seed 0.01%; Other Crop Seed 0.01%; Germination 90%. No Kansas noxious weed seeds; Test month/year 7/03. Buyer assumes responsibility to properly market this seed lot as Resale Certification No. 90886. Submit KCIA copy within 5 business days.

☐ 2nd RESALE movement of bulk registered or certified class seed to a KCIA approved reseller who MUST label this seed for RETAIL SALE ONLY. This seed lot has previously moved as Resale Certification No. D 2222. Seller guarantees label analysis: Pure Seed 99.00%; Inert Matter 0.98%; Weed Seed 0.01%; Other Crop Seed 0.01%; Germination 90%. No Kansas noxious weed seeds; Test month/year 7/03. Buyer assumes responsibility to properly market this seed lot as Resale Certification No. 90666. Submit KCIA copy within 5 business days.

Additional Comments/Information:
1500 bu, trucker signed

The seller warrants only that the seed complies with all applicable Kansas certification standards and is limited as labeled above; given no warranty, expressed or implied, as to productivity of this seed and will not be responsible for the resultant crop in any way. It is mutually agreed that liability is limited to the purchase price of the seed. The buyer agrees that this certificate is evidence of the seed transaction stated and assumes all responsibility to maintain the integrity of the seed.

Declaration of Additional Purchase of Certified Seed for Re-Sale

To be Completed by Grower:

SEED DESCRIPTION: Certified 2137 Wheat

Certification # D2222

I have sold additional 2000 bus. (approx.) of the above described lot to the Seed Re-Saler listed on this report. I understand that I am still liable for the varietal purity of this lot to the extent indicated by the representative sample previously taken and sent to the KCIA office.

Date 9-10-03 Signature J. Seedgrower

To be Completed by Seed Re-Saler:

Seed Re-Saler Name: Bulk Retail, Inc

It is understood that the seed described above is from the same lot as I previously purchased and is represented by Transfer or Resale of Kansas Certified Seed in Bulk form number 906840. It is my responsibility to see that all necessary forms are to be completed and sent to the KCIA office as well as pay all fees that may be incurred in the completion of certification.

Date 9-10-03 Signature Bulk Retail
The rules of The Kansas Crop Improvement Association provide that the registered and certified class of **WHEAT, OATS, BARLEY, RYE and SOYBEANS** may be sold in bulk and certification retained. The certification of the seed designated below will be void if this seed is resold.
