\* Mixtures will have a germination charge added for each additional species tested.

\* Dirty or difficult samples may be subject to an additional charge of \$30.00 per hour.

All tests are conducted according to Association of Official Seed Analysts rules where applicable.

In order to determine if seed is legally marketable in Kansas, a Complete Test (Purity, Germination and Noxious weed exam) is required. For Native mixes and many CRP plantings, germination, purity and a noxious weed exam must be completed to determine PLS (Pure Live Seed) and eligibility for use.
